

# META HELLCAT

## white paper

# INTRODUCTION

The Whitepaper aims to educate readers on the meta hellcat visions. The strategy and roadmap in an easy to understand way. Below we illustrate in detail of our dividend mechanism.

We are excited to be part of the MetaHellcat ecosystem in a showcase that will benefit our holders and the community as a whole.

We will share our vision with you through this as the first auto-claim reward mechanism.

# ABSTRACT

## WHAT IS MetaHellcat ?

MetaHellcat is the brand new of our native token . A new generation auto-yield reward dividend contract powered by the BlockChain. You get rewards / dividends as MetaHellcat token, instead of a token redistribution like most contracts.

People like The MetaHellcat because it's great. Even though it's a Robot , it makes comments about real-life, life in small town America.

Our team is spontaneously formed by fans of the MetaHellcat . We want to regain the glory of the MetaHellcat . We will bring the metal hellcat NFT to make the popular NFT again.

**WHAT IS SLIPPAGE ?**

**WHAT IS REDISTRIBUTION ?**

Slippage is the total amount percentage wise you pay as a “tax” on the buy and sell transaction. Some contracts have different slippage tax for the buy and sell.

The typical contract usually takes a piece of that “tax” that every transaction consumes and redistributes it to the holders in some way or another.

MetaHellcat will redistribute some of this “tax” as a reward to our community.

## **ABOUT THE MetaHellcat**

The MetaHellcat has been on air in the US since the late 1980s, until today, for 29 seasons - the length of time it takes a person to move from the robot ,

For Americans, the show is full of memories and warmth. For us, however, it's a bit "impossible to keep up," whether it's the frequent us.-based memes or the hard from early to end This is a Dao community formed by a group of people who love MetaHellcat . They will help each other consciously and express their love for the MetaHellcat.

# MetaHellcat\_COMMUNITY\_CHAIN

Token holders, amounts, transactions and more can be seen on the blockchain. This is tracked on explorer .

MetaHellcat is a native BEP-20 token and is powered by the ecosystem. The MetaHellcat token dividend is based on a system that is equally proportionally split to the token holders.

This system is fully automated and doesn't add minimal gas fees proportional to value transferred. The number of holders processed through each transaction is dynamic and based on transaction size. Holders will receive dividends from the queue based on their position in the array. It's a fair system, fully automated. Minimum token balance is 500,000 MetaHellcat tokens to receive

During the 1980s, ROBERT thought of process programmes , but The MetaHellcat show that Robot could appeal to as exchange . This is Mark Lawson from BBC Front Robert . Insert , a magazine illustrator, invented the project. He scribbled some figures with distinctive hairdos and gave them the I ronic of his knowlege.

# TOKENOMICS:

## The MetaHellcat Tokenomics

45% Burning

5% Airdrop

50% Pool

Contact :

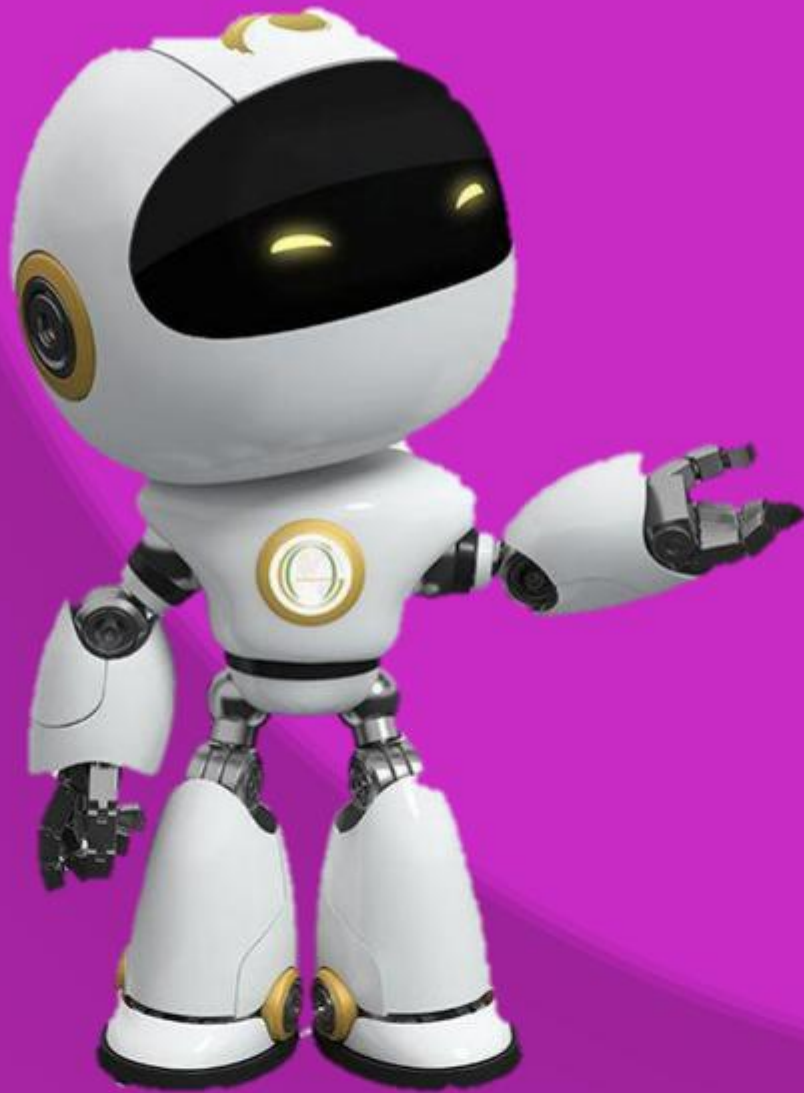

Total supply: 640,000,000,000,000

## MetaHellcat SECURITY AUDIT AND COMMUNITY SAFETY:

Liquidity locked (Locked LP tokens): What this means is that tokens and KCS value that are pushed into the liquidity pool are completely locked. This is an anti-rug pull measure. This keeps both the community safe and happy. A trusted 3rd party will hold the lock contract and act as a middle man for the locked liquidity.

# HOW TO BUY MetaHellcat ?

1. Go to pancakeswap
2. Go to Exchange > Swap
3. Connect your wallet
4. Search for MetaHellcat
5. Swap in BSC for MetaHellcat
6. Click swap and you are done!

# THE MetaHellcat.

(Do not forget to add the contract to wallet)

We will release a smart contract Audit prior to launch to ensure the security of our contract and protection against any bugs or vulnerabilities.

The token contract can be verified on [bscscan.com](https://bscscan.com)

Never give anyone your seed code under any circumstances. We want to keep our community safe from any scammers. Always verify the admin username on all social media platforms.

# MetaHellcat

## ROADMAP

### Q1

- ▶ White paper completed
- ▶ Website completed
- ▶ Liquidity lock
- ▶ Contract verification
- ▶ Launched and tradable
- ▶ Relinquish ownership

### Q2

- ▶ Coingecko
- ▶ Coinmarketcap

### Q3

- ▶ NFT Game develop

### Q4

- ▶ NFT+Metaverse combination
- ▶ Fegx
- ▶ shibaSwap
- ▶ CEX

Finally, make sure to verify you are in the correct group as many scammers create scam token groups that mimic the real thing.
